

PRODUCT INFORMATION

Kabura Lures with Orange Lumo

PROVEN TO GET MORE BITES

- Unique Curly Tail Feature
- Rubber Style Skirt - Two Colour
- 2 x High Quality Owner Hooks
- UV Reflective

The Kabura Lure has become a very popular method of fishing in New Zealand.

Suitable to use in waters of depths up to 80 metres and can be used to catch a wide range of fish species.

TacklePRO Kaburas can be easily distinguished due to the unique **Curly Tail and 2 Colour Skirt**, designed that way to be more attractive and enticing to fish and guarantee more bites.

TacklePRO Kabura Lures use a **High Quality New Generation Rubber Style Skirt**, with much more material than most other brands to attract more fish and to last longer.

All TacklePRO Lures are fitted with **High Quality Owner Hooks**.

How To Use:

- Drop the Lure all the way to the sea bed and pause, then slowly wind 5-10 metres or until you start to feel bites.
- When a fish does bite don't 'strike' the fish but just continue a slow wind.
- If it does happen to get off - Drop the lure back down to the bottom and start again.
- When you have hooked a fish, keep a steady wind all the way up until you land your fish.
- In deep water or if the boat is drifting quickly, you'll need to use a heavier Lure or Drift Anchor to avoid too much line angle.
