

Portable Woodworking Vice

Part # **GZ39006**

Lightweight vice for the young woodworker or home handyman, yet robust enough for professional use.

Designed for two clamping options:

- a. Permanent clamping on the workbench via clamping slots provided in the vice
- b. Additional clamping option via the 2.5/32" (55mm) integrated clamp. This allows the vice to be conveniently clamped to any work surface.

Manufactured from close grained cast iron.

Body and sliding jaw have provision for attaching wooden liners to protect the vice, the work piece and working tools.

Vice jaws are equipped with a "TOE - IN" feature. When fully closed, the jaws meet only at the top to provide even clamping on the whole depth of the work piece.

Steel main screw, guide rods and handle are chrome plated for increased resistance to corrosion.

Jaw Width - 6" (150mm)

Jaw Opening - 4.5" (112mm)

Weight - 2.750kg
